

M210/M211 LABEL PRINTER DEMO BOARD

Indoor/outdoor vinyl

- 5 year average outdoor durability in temperatures from -40°C to 82°C
- Adheres to irregular, curved or rough surfaces

BK on WT BK on OR BK on YL WT on RD
WT on GN WT on BL WT on GY WT on BK
WT on BR WT on PL

Self-laminating labels for wire ID

- Excellent abrasion and smudge resistance
- Automatic multiple repeat of the legend for 360° text visibility

Polyester labels for inside panel markings and general identification

- Durable materials with permanent adhesive in a variety of sizes for flat surfaces such as racks and panels
- Designed to withstand solvent exposure and high heat

Terminal block and patch panel functions

- One simple step to identify your different wires, terminal blocks and patch panels
- Extra small 6 mm tape available for high density patch panels

Bar coding

- Code 39, Code 128
- QR-code, Datamatrix

Flagging

- View labels without touching the wire
- Information is still legible on small diameter wires

Advanced serialisation

- Reduces the time needed to print serialised data
- The serial function consecutively places the next number or letter in the defined sequence on individual labels

Top applications:

Audio & video communication solutions

- Identify cables and components
- Support a quick and correct connection

Breaker box labelling

- Create effortless and clear identification for your distribution box
- Define multiple modules in various widths

Bin ID: Inventory

- Easy to remove when frequent repositioning is required
- Allow to set size of the label so each label is sized to the specifications

Pre-sized labels

- Pre-sized labels allows for consistent sizing from one label to the next
- The rounded corners ensure a more professional look and feel

Authenticated cartridges

When performance matters, choose Authentic Brady materials and printing systems. We back each product with a commitment to high quality.
